## WORK EXPERIENCE

2023 - PRESENT

**Ratan Tata Maharashtra State Skills University** <https://mssu.ac.in/>  
Dotnet Developer

- Designed and developed a range of web-based applications using ASP.NET, C#, Bootstrap, and SQL Server.
- Created Admin Login, User Login, and Center Login systems from scratch, including UI/UX design, backend development, and SQL integration.
- Developed Admission Forms, Fees Receipts, RDLC Reports, Receipt Download PDFs,Excels, Application Forms, Hall Tickets and Registration Forms.
- Responsible for front-end design (ASPX page development using Bootstrap), back-end coding (C# on ASPX.cs),and database management using SQL ServerManagement System (SSMS).
- Implemented functionalities such as form validation, PDF & Excel generation, and automated reporting.

## PROJECTS

### Movie Ticket Booking System

Technologies :

- ASP.NET MVC, C#, Entity Framework, SQL Server,Bootstrap, HTML, CSS

Description :

- Developed a movie ticket booking application using ASP.NET MVC and Entity Framework Code First Approach. The system includes Admin & User authentication (Forms Authentication), role-based authorization, CRUD operations for movies and theatres.

Key Features :

- Used MVC design pattern for clean separation of concerns.
- Implemented Forms Authentication and [Authorize] filter for secure login and role management.
- Created dynamic dropdowns, forms, and validation using Razor views and jQuery.
- Applied Entity Framework with Code First Migrations to create & manage database.
- Built responsive UI using Bootstrap 4 and client-side scripting with jQuery.
- Integrated ticket booking management and PDF & Excel report download feature.
